To Whom it May Concern,

After reading over the proposals, I would like to impress upon MDOT and the city of Baltimore how **important** safe pedestrian and bicycling infrastructure is to the communities of Baltimore. Every day someone in this city is struck, or has had a near miss that no one hears about, because of the lack of safe streets. It's time for the city to move all the way into the next century, and towards a livable city that includes all of it's inhabitants. Safer walking and biking allows for that. it makes the city a viable community, and gives business's around the city a whole new opportunity to find their customer base. Please-DO NOT DELAY ANY FURTHER.

Cordially -Misty L Letts
