### Description:

This project provides for routine replacement of buses past their useful service life. Planned purchases include 310 forty-foot clean diesel buses and 40 sixty-foot clean diesel articulated buses. MTA continuously receives deliveries of buses for MTA service. MTA also proactively repairs and replaces bus components at key points in the vehicle's life, including the engine, battery, brakes, suspension, body, paint, and wheelchair/ADA, electrical, pneumatic systems, and other components as needed. Batteries in hybrid electric buses batteries near the end of their useful life will be replaced. This project also covers the purchase of paratransit vehicles under MTA's Mobility program which is a specialized door-to-door service for people with disabilities who are not able to ride fixed route public transportation, including lift equipped buses. In addition to the matching funds listed, MTA has committed \$76 million in state dollars.

### Justification:

In order to reduce operating and maintenance costs, the MTA is committed to procuring new buses to support fleet capacity requirements and to replace aging equipment. This systematic replacement reduces high out of commission rates and the excessive major repair problems that arise from retaining buses beyond their economic life. Replacement with clean diesel buses helps meet higher federal emissions standards. To improve bus reliability, the mini overhaul program for bus vehicles will simultaneously increase vehicle lifespan, improve maintenance efficiency, reduce mechanical breakdowns, mitigate safety risks, develop the workforce through training, and create cost savings. Funds are also needed to provide paratransit vehicles within the Baltimore region. MTA's Mobility program satisfies the American with Disabilities Act (ADA) provisions adopted by the Federal Transit Administration.

**Amendment:** This amendment increases Section 5307 funds by \$10.1M (\$6.4M federal/\$3.7M matching), Section 5339 funds by \$3.3M (\$2.6M federal/\$0.7 matching) and CMAQ funds by \$51.5M (\$42.3 federal/\$9.2 matching) in FY 2024 for construction. These increases are a result of shifting funds from previous years to the correct year of obligation. The total cost increases from \$97.5M to \$162.5M.

### Connection to Long-Range Transportation Planning Goals:

- 2.C Improve and Maintain the Existing Infrastructure -- Maintain/replace transit vehicles.
- 3.A Improve Accessibility -- Increase transportation options and equity for all populations.
- 3.B Improve Accessibility -- Improve ADA-related conditions for pedestrians / transit riders.

### Description:

Mid-life Overhaul of 53 Light Rail Vehicles and upgrades to various systems/sub-systems to address obsolete parts, improve safety and vehicle performance, and enhance passenger comfort. The overhaul has been engineered to provide an additional 15 years of service of the light rail vehicle fleet. Metro cars were designed with a 30 year life and are due for replacement. The Automatic Train Protection system is experiencing reliability issues due to its age and obsolete parts thus increasing maintainability issues across its various systems/sub-systems. The replacement of Metro Cars and Train Control System with modern, reliable equipment will enhance passenger comfort, ensure better reliability and improve safety. Delays were a result of Covid such as material delivery, sub-suppliers, internal Alstom impacts and plant shutdown. In addition to the matching funds listed, MTA has committed \$106 million in state dollars.

### Justification:

The replacement of Metro vehicles and the Signaling System with modern and reliable equipment will enhance passenger comfort, ensure better reliability and offer improved safety. The MTA's Metro Signaling System consists of a double tracked train controlled signaling system that is 15 miles long. The Metro train control system was installed in three phases and the oldest section is currently 30 yrs old. The Automatic Train Protection system is currently experiencing reliability issues due to its age and parts obsolescence thus increasing maintainability issues across its various systems and sub-systems. Light rail fleet overhaul is designed to reduce system failures and improve reliability and service.

**Amendment:** This amendment shifts funds from previous years to the correct year of obligation. Section 5307 funds increase in FY 2024 for construction by \$14.5 million (\$11.6 million federal/\$2.9 matching) Additionally, CMAQ funding increases in FY 2024 by \$26.6 million (\$20.0 federal/\$6.6 matching). The total estimated cost of the project increases from \$152.9 million to \$194.0 million.

### Connection to Long-Range Transportation Planning Goals:

- 2.C Improve and Maintain the Existing Infrastructure -- Maintain/replace transit vehicles.
- 2.E Improve and Maintain the Existing Infrastructure -- Improve the condition of transit infrastructure and stations/stops.
- 6.A Improve System Security -- Provide security-related features at transit facilities or on transit vehicles.
